Pharmacist/Patient Dialogue

1. **Patient:** Yeah, and I can't stop scratching them.
2. **Patient:** Not that I know of, but I don't think so.
3. **Patient:** Thank you so much.
4. **Patient:** Yeah, come to think of it, I did. That's why I left the water.
5. **Patient:** Hi, I was wondering if you could give me some advice. I was swimming in the ocean today, and when I got out, I noticed that I had all of these red bumps from my waist down.
6. **Patient:** I have a hard time swallowing tablets and pills. Does Benadryl come in a liquid?
7. **Patient:** A jellyfish sting? What should I do to get rid of this itch?
8. ***Pharmacist:*** Well, it looks like you have a bumpy rash caused by a jellyfish sting.
9. ***Pharmacist:*** Do they itch?
10. ***Pharmacist*****:** Are you allergic to any medications?
11. ***Pharmacist*****:** I can see from your scratch marks. You only went into the water up to your waist? Did you feel a sting?
12. ***Pharmacist*****:** No problem. Glad to be of help.
13. ***Pharmacist*****:** I would recommend Benadryl tablets and hydrocortisone cream. You'll find them in aisle 5.
14. ***Pharmacist*****:** Sure. You can get it in liquid form. Follow the directions for both the Benadryl and the hydrocortisone cream. And if the itching and rash continue, call your doctor.

Individual work: Arrange and write the correct order of the dialogue
